

A Connective Impact Partnership Success Story Strengthening Health Systems In Kenya and Tanzania

The connection to the Patrick J. McGovern Foundation led us to an opportunity to co-create a project around an important strategic priority for InSupply Health and our Ministry of Health partners

— Yasmin Chandi CEO, InSupply Health.

Identified Potential Program Areas

With a diverse program portfolio, Connective Impact identified InSupply Health's expertise in supply chain management and digital technology and recommended a connection to the Patrick J. McGovern Foundation.

Time to Partnership

6 mths

Partnership Amount

\$360K

Facilitating Connections

Connective Impact reached out to the Patrick J. McGovern Foundation, highlighting InSupply Health's work to advance healthcare in underserved communities. The Foundation saw alignment with their digital health portfolio and sought to learn more through a facilitated introduction.

3 GOOD HEALTH AND WELL-BEING

17 PARTNERSHIPS FOR THE GOALS

Short Term Program with Long Term Implications

The Patrick J. McGovern Foundation provided InSupply Health a 14-month grant to explore use of artificial intelligence to improve health supply chains, including building out partnerships with the Ministry of Health in Kenya and Tanzania.
